CLERK/TREASURER
NICOLE O'CONNOR
DEPUTY CLERK
SHARLENE GRENIER

July 1st, 2024

As part of the EPA's newly revised lead and copper rule, **every water utility across the country is required to inventory all of its water service lines** both on the public side and the private side. **We need your help in complying with this mandate.** We ask that each residence determine the materials of their water service line and submit photos to the Village to keep track of the inventory. This data can then be provided to the EPA per their requirements.

We have created a page on our website with instructions for how to determine the material of your water service line: <http://www.delanson.net/service-line-inventory-instructions/>

Once you have gone through the step by step instructions, you can then submit your information and pictures to the Village using the following link: <http://www.delanson.net/inventory-form/>

We would like to have all water services lines inventoried by August 31, 2024.

If you do not have access to the internet or if you do not feel comfortable submitting information online, please contact the office at 518-895-2199 and we can mail a physical form out for your use.

Additionally, if you would rather have the Water Commissioner come out and do this assessment for you, please contact the office at 518-895-2199 and we can work with you to schedule a time for that visit.

Thank you in advance for your assistance in getting this inventory done; we appreciate it!

Best regards,

Village of Delanson Water Department
